

## **Medical Form**

**Upon registration**, all parents are asked to complete the medical form and return it to the school clinic where it will be kept in your child's medical file.

It is our policy to take all steps within our power to prevent personal injury and health hazards. We fully recognize our responsibilities as far as is reasonably practicable to extend this protection to students and members of the general public from foreseeable risks.

## The School Clinic

The school clinic is staffed by fully qualified medical staff who are available in the clinic Sunday to Thursday, from 8:00 a.m. to 3:40 p.m. Students who are medically unfit should stay at home, and students who feel sick during the day may report to the school doctor. All medicines and prescribed drugs must be registered with the school doctor.

If your child is to be administered a medication from your doctor during school hours, it will be given to the school clinic first thing in the morning, with an accompanying letter from the parents or doctor. It can then be collected from the clinic before going home. Please clearly write the child's name, class, time, and dose of the medication. Medicines are not to be kept with children. Students, who are using the school transportation, can leave their medicines with the bus assistants.

## **School Vaccinations**

In accordance with the Iraqi government's polio vaccination program, a medical team is to visit the school giving both initial and booster vaccinations to those students (under five years of age) who have not been immunized against polio or require a booster, and who, with their parents consent, wish to receive it. Before the assigned date, parents will receive a form in which they indicate their decision as to whether or not they wish their child to be vaccinated at that time.

## **Guidance and Counseling**

The school counseling services constitute part of the duties of the following personnel:

- The Head Supervisor
- The Academic Quality Controllers
- The Student Life Coordinator
- The Director

All students are free to, outside of class time, meet with any of the above people to discuss school or personal matters. It is the nature of the academic administrators' daily tasks that they willingly provide counseling to all their students as and when needed. It is this school's philosophy, and that of SABIS® Network schools generally, that it is the duty of all our professional staff to talk to students and to guide them not only academically, but also pastorally.
